

In the mid- to long-term, displacement will increase with intensification of heavy precipitation and associated flooding, tropical cyclones, drought and, increasingly, sea level rise. Small Island States will be disproportionately affected (IPCC, 2022)

In Fiji, more than 40 communities are identified to be highly vulnerable, with potential for relocation

Comprehensive Risk and Vulnerability Assessment Methodology

IMPLEMENTATION

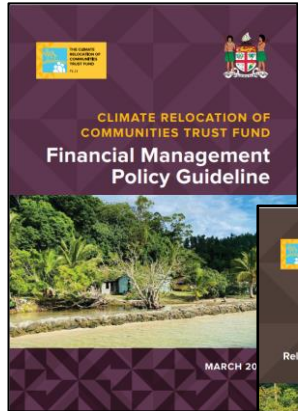

Monitoring, Evaluation, Reporting & Learning Framework Post Planned Relocation

Operationalised (CC Act)
